**EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE**

***Information Disclosure Statement***

1. Applicant's Information Disclosure Statement dated 8/10/2009 has been considered and the references therein are not found to affect the patentability indicated in the previous notice of allowance.

2. Claims 1, 13, 14, 15, 17, 18, and 22-26 (to be re-numbered as 1-11) are allowed.

3. The following is an examiner's statement of reasons for allowance:

Examiner notes claims 1 and 13 have been amended to incorporate the allowable subject matter of claims 10 and 16, respectively. Regarding claim 1, the most relevant prior art of record, the combination of Usui et. al (JP404242106A) in view of Mack et al. (US patent 6,377,700), Teitelbaum (US 5,872,834) and Picone et. al. (US 5,293,452), previously used to reject the claims discloses the claimed limitations of at least one camera directed toward a user's face and configured to record at least two still images of a user from at least first and second angles of view and to obtain at least one additional still image of the user's face in addition to the at least two still images; and a processor connected to said at least one camera, configured to process the at least two

still images obtained by said at least one camera and to generate a 3- dimensional model of the user's face using the at least two still images and to generate a facial texture bit map of the user's face using the at least one additional still image of the user's face, and to compare the generated 3-dimensional model and the facial texture bit map with the stored user profile information to determine whether the user is authorized to access the system, said processor comprising an access device configured to grant access to the system when the generated model and the facial texture bit map matches the profile information of one of the authorized users stored in a memory, thereby indicating recognition and authorization of the user, and an updater configured to update the profile information of the one of the authorized users with the generated model after each grant of access by said access device such that the updated profile information comprises an average of the generated model and the previously stored profile information.

However, the prior art of record, the combination of Usui et. al (JP404242106A) in view of Mack et al. (US patent 6,377,700), Teitelbaum (US 5,872,834) and Picone et. al. (US 5,293,452), fails to provide for the a transmitter configured to transmit the images to a server over a network and to receive a 3-dimensional model and a facial texture bit map from the server, which was objected to in the first Office Action. The Examiner has not found any other prior art to anticipate or render obvious the quoted claim limitations when read in light of the other claimed limitations. Accordingly, claim 1 is found to be allowable. Claim 13 is also allowable due to the incorporation of similar allowable subject matter indicated in the first Office Action. Claims 17, 18, 22-26 were previously allowed. Therefore, all of the claims 1, 13, 14, 15, 17, 18, and 22-26 are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
